# Casey Miller

Denver, CO                    Junior Software Developer

## Profile

I am an aspiring developer and a recent graduate of a full stack Coding bootcamp through the University of Denver. I bring a creative, can-do attitude to every project I take on.

I am still learning but I have built web front ends as a hobby for decades. Throughout my training I have gained a strong foundation in building a full stack application in Javascript using current good practice and modern techniques.

I have encountered many challenges during my education but I loved every minute of it. I thrive in a fast paced, challenging environment and I look forward to all of the new things I will learn as a Junior Developer.

## Skills

- JavaScript
- Full Stack MERN
- Express Server
- Heroku
- Bootstrap

- HTML
- React JS
- Apollo Server
- MVC
- Materialize

- CSS
- SQL
- PWA's
- Stripe API
- MD Bootstrap

- GitHub
- MongoDB
- Atlas
- jQuery
- Sequelize

## Education

*04/2022 - 07/2022*
**University of Denver** | Full Stack Coding Bootcamp

## Work Experience

*04/2012 - 02/2022*
**Viator Trucking LLC** | Owner Operator Truck Driver
I was an owner operator truck driver for 10 years. I handled all aspects of the business including managing all financial planning, fixing the truck and even booking the freight. Of course, I also did all of the driving in between. This has given me a strong working knowledge of what it takes to get a job done and run a small business. There is a lot more to any project than just what you see up front and proper planning is essential.
